

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant:	Toth, et al.	Examiner:	Schlientz, N.W.
Application No.	10/800,291	Group Art Unit:	1616
Filed:	March 12, 2004	Docket No.	14669.0064USU1
Title:	STABLE PHARMACEUTICAL COMPOSITIONS OF DESLOMATADINE		
Participants:	Examiners Nathan W. Schlientz and Johann R. Richter; Applicants' Representative, Daniel R. Evans.		

OCTOBER 20, 2008 INTERVIEW SUMMARY

Applicants' representative the examiner discussed the merits of the case. Applicants' representative presented arguments with regard to the products disclosed by Villani not anticipating the instant claims. Applicants' representative further argued that Schumacher clearly teaches that mixtures of polymorphs of desloratadine is undesirable (col. 4, II. 5-11). Applicants' Representative then presented WO 92/00293, Example 1G, wherein desloratadine is recrystallized from toluene. The Examiners requested that Applicants reproduce examples V and VI of Villani, and example 1G of WO 92/00293 and submit the data in the form of a declaration in order to show that the product of Villani and WO '293 in fact are not mixtures of desloratadine that anticipate the instant claims.
